# APPLICATION SUITE
AN2GO - MAINTENANCE

Keep in control!

- Take advantage of A2NGO solutions to control in real time and manage at lower cost your beaconing system

- A2NGO is designed for managers and operators of AtoN

- Improve the availability of your assets

A2NGO Maintenance - How does it work ?

- Application available online through a cyber-secure web-portal

- Modules to set-up, schedule, and follow-up the maintenance operations

- Complementary of the module A2NGO Monitoring, it can also be used separately

- Allow to personalise the maintenance plans

- Display the scheduled and carried out operations, in list mode or in map mode

- Generates, displays and records the intervention reports

A2NGO
KEEP IN CONTROL !

CUSTOMISABLE TOOL

- Multi-users with different profiles management (administrator, manager, operator)
- Multi-sites (allows to create several AtoN regions or sub-regions)
- Available in English, French, Spanish and Portuguese
- Intuitive and fast to learn

SECURED DATA

- Webportal application with a cyber-secure and personalised access
- Registration and storage of data on cyber-secure and duplicated servers
- All data is stored and centralised with no risk to loose information (no more paper!)

CONFIGURATION OF MAINTENANCE PLANS

- Set-up at components level (support, lantern, radio aids...)
- Customised maintenance plans (level, recurrence...)
- Possible integration of the existing AtoN equipements

OPERATIONS SCHEDULING AND FOLLOW-UP

- A single application to centralise all the information : immediate visibility of activities
- Possibility to group, sort out the AtoN and the maintenance operations
- Allow to work proactively, to limit emergency interventions
- Automatic edition of interventions forms with the necessary human and tools ressources
- The intervention forms are filled in online or through the *GISMAN Bluetooth®* App
- Spare parts management module

IALA AVAILABILITY RATE CALCULATION

- Calculated for each AtoN
- Allow to report to the top management and international organisations (IALA, IMO)

CONNEXION WITH THE A2NGO SUPERVISION APPLICATION

- Complementary to the A2NGO Supervision, which feeds back the information to the A2NGO Maintenance module
- Allows to foresee, plan and follow maintenance operations and to improve the availability rate of the AtoN monitored in A2NGO Supervision

CUSTOMER SUPPORT

- Personalised study to integrate the equipment already in operation
- Support on configuration and commissioning
- Training on how to operate A2NGO Monitoring and Maintenance suite
- Dedicated after-sales support service
