

POLYETHYLENE BUOY

GBM-2500

Diameter: 2.5 m Volume: 5.25 m³
For semi-exposed sites

With its modular design, the hybrid buoy type GBM-2500 can match various applications. The combination of its 3 main elements is custom-made according to site conditions and client requirements.

Features:

- 4 segments of float in virgin polyethylene, UV stabilised and precompounded to reduce colour ageing, with standard wall thickness 10 mm and expanded polystyrene (EPS) foaming
- Polyethylene or aluminium spar
- Central structure in galvanised steel

Advantages:

- **High visibility** spar compared to lattice towers
- Buoy with ballasted tail for **improved stability**
- Buoyancy ensured by **modular design**, even in the case of collision
